

## **Teiichi Sato**

### **World Conference on Science – Science for the twenty-first century – A New Commitment (1999 Budapest)**

Common understanding

Proclamation on four issues:

- Science for knowledge; knowledge for progress
- Science for peace
- Science for development
- Science in society and science for society

1. Two aspects of science

- Usefulness of science in society
- Capacity of society for utilizing science

2. The backgrounds

- Understandability of the rapidly progressing cutting edges
- Lack or ignorance of foresights for harmful outcomes
- Complicated systems
- The phases of failures (The influence of miss judgment)

3. Some policy issues

- The role of the researchers and policymaking
- Enriching social understandability
- Science education
- University – the center of the learning

4. Professor Yoshikawa's paradox

- Toward the knowledge society
